

## **Enterprise EHR Update – New! Radiology Results Reporting**

June 3, 2009

Aloha Enterprise Customer:

In partnership with The Queen's Medical Center, TeamPraxis is pleased to announce that Enterprise EHR is now interfaced to Radiology Associates/Acculmaging and Queen's Medical Center Imaging Services. This allows our ConnxtMD customers to receive radiology text result reports electronically. Complete user documentation on this new service is now available at our website, [www.teampraxis.com](http://www.teampraxis.com), via Help Desk, Enterprise EHR.

You may choose to receive reports on one or both interfaces. To establish service for your practice, please download and complete the Radiology Associates/Acculmaging and/or the Queen's Medical Center Imaging Services authorization form from our website. Fax your completed form back to CRM Support at (808) 949-0483. Our team will handle all setup and notify you when your practice has been activated.

We hope you will take advantage of this easy-to-use new feature. If you have any questions, please email us at [crm@teampraxis.com](mailto:crm@teampraxis.com). Check out our website today!

Mahalo,  
Your Client Relations Management Team
